Andøy (8000), an island in Northern Norway 300 km north of the Arctic Circle, with fresh air, steep mountains, vast areas of marsh-land, and picturesque fishing villages. You may get beautiful weather as well as stormy days. The midnight sun is visible from May 19 to July 23. Andøy Rocket Range is located near Andenes (4000), the municipality center. Here you will find the Polar Museum as well. Every year, in July, the Andøy Deep-Sea Fishing Festival is held. Another annual event is The Walking Race (35 km). If you take an interest in geology, archaeology, flora, birds and fish, you may find reasons for coming back year after year.
